

6/20/08

Dear Dr. Sarghe,

Just a note to thank you and your staff (both office and operating room) for the courteous and efficient treatment I experienced in this past month.

I admit, I was a bit apprehensive regarding the procedure to be performed on both my eyes, but due to the kindness extended me, I was both relaxed and secure knowing all would be well.

The "Crystal Lens" that was implanted following cataract removal is truly amazing. I can see things I could not see before without my glasses. Even colors are so much more enhanced.

I would strongly recommend this procedure to anyone contemplating cataract surgery. Your technique of not using needles, stitches, etc. is the best.

Thank you all again  
Sincerely,
