

Dear Doctor Sayegh:

I'd like to thank you and your staff for the attention given to me during each of my appointments in preparation for and after my cataract surgeries.

As you know I have a right eye astigmatism and my goal was to eliminate the need to wear glasses. You clearly explained, in detail, several options that were available to me regarding lens implants. You answered all my questions.

I chose to have the **TORIC** lens implanted into my right eye, which corrected the astigmatism and therefore eliminated the need to wear glasses for normal activities. It was absolutely the right decision. I am very pleased with the results.

I'd also like to mention that everyone at the *Eastern Orange Ambulatory Center* where you performed my surgeries was professional, friendly and efficient and relieved my anxieties prior to and after my surgeries. Post-Op instructions were carefully explained and the follow-up call I received the day after my surgeries was appreciated.

With my sincere appreciation,
